

Favorite Recipe-HTML AND CSS PROJECT

Task: Create a simple **themed** web page using HTML/CSS code.

The Web Page will feature your favorite recipe and will include three sections.

- Recipe Ingredients
- Recipe Directions
- Recipe Images

Directions:

- Create a title for the page (in head): Name of Recipe
- You must use a Google Font stylesheet
- You must change cursor
- You must add favicon

In <style> create CSS rules for the following:	In <body>
<ul style="list-style-type: none">• body: Create a CSS rule for background-color to be a color of your choice, or background image.• Add a page border that must be an image	
<ul style="list-style-type: none">• Create a class favorite and style this however you'd like examples: font-color, background-color, font-family, borders etc.	<ul style="list-style-type: none">• Insert this class to an h1 tag and the content should say the recipe name for example: Pistachio cake. This h1 tag should be the first header of your page. Under recipe name Include an image of the finished recipe with mouseover effect.
<ul style="list-style-type: none">• p: style p tag with the following properties: (choose values yourself!)<ul style="list-style-type: none">• margin: auto;border:text-align:center;width:font-family:font-size:	<ul style="list-style-type: none">• In p tag include an introduction to this recipe. Explain why this is a part of your family tradition, who usually prepares this dish, at what times of year, holidays, or events do you enjoy this meal? Share any memories you have.
<ul style="list-style-type: none">• h1: Style h1 tags. Use below properties:<ul style="list-style-type: none">• text-align:center;font-family:font-size:Any other styling you'd like	<ul style="list-style-type: none">• You should have an h1 tag for each section: Ingredients, Directions, and Images.
<ul style="list-style-type: none">• UL: List Items for recipe ingredients should be styled by changing default list-style-type to an image.• OL: List for Directions you can style as you'd like	<ul style="list-style-type: none">• Under ingredients, list ingredients• Under directions, list directions on how to make recipe.

****NOTE: ALL STYLING MUST BE IN CSS NO INLINE STYLE IS PERMITTED!!**

<ul style="list-style-type: none"> ● img: Create a CSS rule for your images to have the same height and width, and border-style 	<ul style="list-style-type: none"> ● Insert 3 images in the images section
<ul style="list-style-type: none"> ● Create an id footer and style this section however you'd like. Examples: font-color, background-color, font-family, font-size. 	<ul style="list-style-type: none"> ● Insert this id to a p tag at the bottom of your page. Content should include: copyright symbol, your name, year, and also the source of where you found the recipe. You should insert a link to the source as well. If you have a family recipe, link to Stop and Shop to purchase ingredients.
<ul style="list-style-type: none"> ● a: Create a CSS rule to style links to be a color other than blue. Make sure you use target=_blank attribute to make links open in different tabs. 	

Additional Requirements

- Use a variety of HTML formatting to add visual elements to your site! Examples: formatting, hr br, sup, sub, mark, title attribute, entities, etc.
- Consider using tables without borders to layout your site
- Add additional style declarations as you see fit such as styling by tag, class, ids
- Create several anchor tags to navigate your page to the different sections: Including Go to Top.
- Effort and Creativity!
