

Wireframe

What is a wireframe?

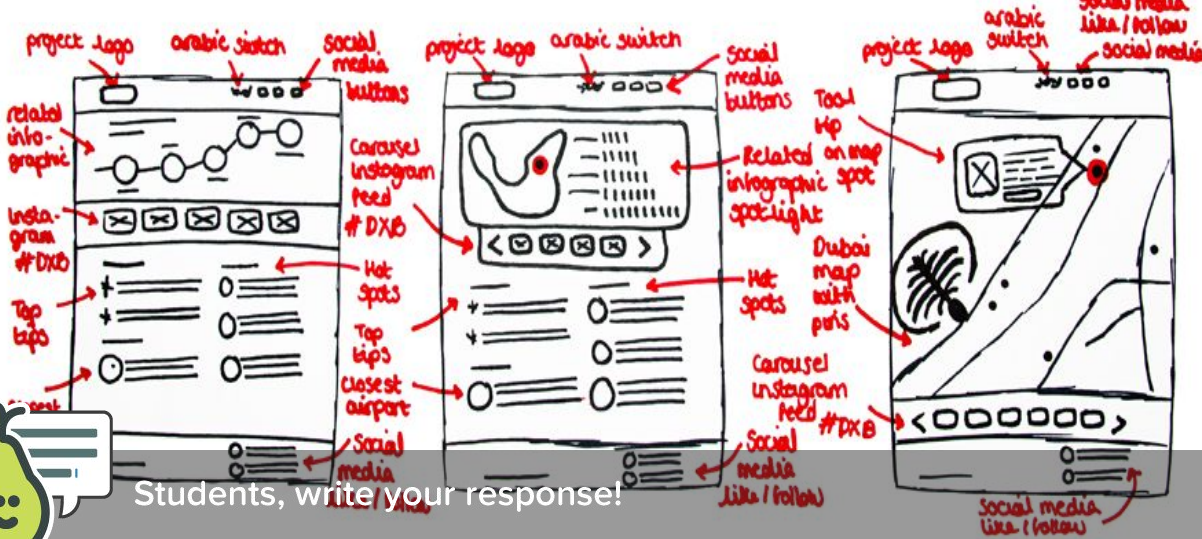

Take some notes in your notebook, what do you think a wireframe diagram is?

This is another example of a wireframe diagram.

Using this diagram and the previous video, as group come up with a definition for the word “wireframe”

Students, write your response!

Turn and talk

With your group, come up with at least two - three reasons someone making a website might want to do a wireframe diagram first.

Students, write your response!

Unplugged activity

- Create a wireframe of your website using the provided chart paper and markers
- You probably want to start with pencil at first
- Your wireframe should include...
 - at least 4 pages including the main one
 - the main page should connect to the other 3
 - at least one link to a website
 - at least one embedded video
 - a form to collect names and emails

Gallery Walk

Now that you have completed a draft of your wireframe we will go around and evaluate each other's work

Each group should add a post-it note to the chart paper and be sure to include:

- One glow
- One grow/ suggestion for improvement

Revise your wireframe

Revise your wireframe with your group and take a picture of it and upload it to the google classroom assignment
