Website Accessibility

Importance

- It is very important for websites to be accessible to a multitude of individuals who are using the internet including individuals who are
  - Sight-impaired
  - hearing -impaired
  - Color-blind
  - Etc.

What makes a website accessible

Please review [Accessibility Principles | Web Accessibility Initiative (WAI) | W3C](#) and list out at least five features that one must consider in making a website accessible

Is NYTimes.com accessible?

[New York Times Website](#) Is the NYT website accessible? Think about the criteria you read about before when formulating your answer

Test it out!

Use the [Accessibility Test](#) to check out [the New York Times](#)

- How did your idea of the accessibility of the NYTimes website compare with the school you got when you imputed the website? Were you surprised by anything?

Take screenshots
of your before and
after and describe
how you matches

Let's look at yours!

- Look at your website and determine what 2-3 things need to be changed to improve accessibility.
- Adjust these things for the final product of your website!
